EXPERIENCE

Software Developer Intern

May 2025 – Aug 2025

DataVinci Analytics Agency | Python, Next.js, TypeScript, PostgreSQL, REST APIs

Remote

- Engineered and shipped **5+ production features** for **Grippi.io** (AI Marketing SaaS), including multi-channel campaign analytics and automated reporting serving **500+ active users**.
- Reduced average analytics dashboard load latency from **3.2s to 1.9s (40% faster)** by restructuring SQL join patterns and implementing composite indexes on high-cardinality foreign keys.
- Architected interactive real-time data visualization dashboards in **Next.js/TypeScript**, improving client retention and driving a **35% increase** in platform daily active usage.
- Developed resilient **RESTful ingestion pipelines** with automated schema validation; authored **50+ unit/integration tests** using **pytest** under CI/CD workflows.

Summer Research Intern

Jun 2023 – Aug 2023

Madhav Institute of Technology and Science (MITS)

Gwalior, India

- Performed exploratory data analysis (EDA) and data preprocessing on structured datasets using **Python (Pandas, NumPy)**, cleaning null values and evaluating baseline classification models.

PROJECTS

MugshotAI – Face Trace & Blockchain Registry | Next.js, TensorFlow.js, Ethereum Sepolia

[Live Demo](#) 

- Developed a **face recognition pipeline** using **TensorFlow.js** to extract facial feature vectors directly in the browser, guaranteeing raw user photos never leave client devices.
- Built a **reverse-image search aggregator** integrating **Google Lens (via SerpApi)** to trace web appearances across social platforms, using **cosine similarity** to filter false positives.
- Deployed a **Solidity smart contract** on **Ethereum Sepolia** to anchor crypto hashes(**Keccak-256**) evidence digests, establishing an immutable, tamper-evident verification trail.

IndiaQuant – MCP Financial Server | Node.js, MCP Protocol, SQLite, Yahoo Finance

- Engineered an **MCP server** over **stdio transport** (JSON-RPC 2.0) exposing 10+ financial tools to Claude Desktop with **<500ms latency**; built an in-memory TTL cache to safeguard external API quotas.
- Implemented a virtual trading simulator with SQLite persistence and a **Black-Scholes options engine** computing real-time Greeks (Delta, Gamma, Theta, Vega, Rho).

Eventra – Real-Time Event Ticketing SaaS | Next.js 15, Convex, Clerk, Stripe Connect

[Live Demo](#) 

- Architected a fair waiting-list queue system in **Next.js 15 & Convex**, using scheduled background jobs (**ctx.scheduler**) to enforce a **30-minute reservation lease** and prevent race conditions.
- Integrated **Stripe Connect** for automated split payouts alongside reactive WebSocket subscriptions and idempotent webhook handlers for reliable ticket inventory sync.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, C++

Backend & Architecture: Node.js, Express.js, RESTful APIs, GraphQL, Model Context Protocol (MCP), WebSockets, JSON-RPC, N8N automation workflow

Databases & Cloud: PostgreSQL, Convex, SQLite, MongoDB, Docker, AWS (EC2, S3), Railway

Frontend & Tooling: Next.js 15, React 19, Tailwind CSS, Git, GitHub Actions, Linux/Bash, Pytest, Postman

EDUCATION

Madhav Institute of Technology and Science

Gwalior, MP

B.Tech in Information Technology | **CGPA: 8.21 / 10.0**

Nov 2022 – May 2026

- Relevant Coursework:** DSA, DBMS, Operating Systems, Computer Networks, System Design, OOP

LEADERSHIP & CO-CURRICULAR

Technical Community Lead: Organized 5+ hackathons and workshops across Google Developer Groups (GDG) and GeeksforGeeks campus chapters, impacting 1,000+ student developers.
